

OnePayroll

Next-generation payroll for Business Central

Payroll expertise, Microsoft technology, and AI, brought together in one modern cloud solution.

Built from the ground up for the cloud and AI era, OnePayroll keeps payroll connected to the business systems and financial data you already rely on.

PAYROLL + MICROSOFT. BETTER TOGETHER.

Why move critical payroll data outside your Microsoft ecosystem? OnePayroll brings payroll and finance together in **Dynamics 365 Business Central**, helping you keep data connected and payroll in your control.

AI THAT IS PART OF THE PRODUCT.

OnePayroll was designed from scratch for a new generation of payroll. **AI, automation, and intelligent agents** are part of how we build the product, not features layered onto a legacy system.

BUILT FOR THE COMPLEXITY OF PAYROLL.

Payroll rules aren't one-size-fits-all. From complex union requirements to proactive validations and compliance checks, OnePayroll helps you **configure the rules that apply to your workforce and surface issues before they become urgent.**

PAYROLL IS WHAT WE DO.

Modern technology is only as good as the payroll knowledge behind it. OnePayroll is shaped by **decades of payroll experience across countries and complex requirements**, bringing that knowledge into a new generation of payroll.

FOR FINANCE

Connect payroll and financial data, understand payroll costs, and build more meaningful KPIs across both.

FOR PAYROLL & HR

Automate repetitive work, surface compliance issues, and spend less of the payroll cycle chasing problems.

FOR IT

Choose a modern Microsoft cloud solution built to simplify updates, security, scalability, and ongoing maintenance.

Ready to rethink payroll?

See what happens when payroll expertise, Microsoft technology, and AI come together to create a new generation of payroll.
